

September 8, 1955

Dear Dr. Lelfson:

Just a word to tell you I'd gotten back to the lab., and have had a chance to look at the very pretty slides of the organisms you sent me. Judging from their microscopic appearance, they represent just the range of types that I was asking for. I am growing the cultures out now and will have a try at correlating their motility behavior after fission with the microscopic appearance.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
